Building Improvement Matching Grant Program

Thanks to continued support from the City of Portsmouth CIP Fund, Main Street Portsmouth was able to award \$32,000 to five building improvement projects in 2012. A total of seven applications were received, with a total estimated investment of \$158,300. This year's grant recipients are Ruth Buckler, Jim Daehler, Jack Vetter, Smith Drug Co., Inc., and Yost Engineering. Yost Engineering received \$15,000 in grant funding, making them the recipient of the largest grant awarded by the Building Improvement Grant Program committee to date. The Building Improvement Grant Program allows owners of commercial properties within the Main Street Portsmouth district to apply for matching grant funds for eligible improvements that are visible from a public right-of-way. These grants are in recognition of the positive impact that individual building renovations can have on the overall appearance and quality of their storefronts.
